The Career Services Center provides a model of career management that focuses on developing the student by assisting them to understand their career choices and how these choices may affect their future. Our office assists students in becoming "ready" for their career with services such as resume development, interviewing skills, and other practical skills necessary in the successful job search. For those who work full time or are not currently seeking employment, we offer professional development services to assist our students in their progression in their current job.

In addition, we consider ourselves the portal to UNCG for our employers seeking to partner with the university in recruitment, developmental ideas, and image management. By cultivating partnerships with employers, we facilitate growth in public, private, government, and corporate sectors while assisting students in reaching their career goals.

**Career Team Access:** we have a group of Career Team members who are available Mondays – Fridays, 10am – 5pm, to assist students with career readiness topics such as resume development, industry information, cover letters, interview skills, job and internship search planning, and more. **No appointment needed – just walk in!**

**Career Branding:** we work with students on this concept to guide them in defining and managing their career goals by assisting them to articulate their personal brand, and then translate their brand into all facets of professional life, including job search strategies.

**Individual Career Advising:** UNCG students are entitled to 1:1 career advising sessions to provide more personalized assistance in defining their personal brand and developing the appropriate marketing materials to support it. Our professionally trained career staff members have specific educational background in career development processes and strategies, have over 40+ years of combined experience in the field, and are in constant contact with employers. **We are the campus experts on career branding!**

**Special Programming:** Throughout the year Career Services sponsors a number of special workshops and events, including:
- **Career Fairs:** targeting employers with internships and jobs
- **Theme Weeks:** providing students with more concentrated exposure to select topics and industries.
- **Webinars:** seminars conducted online throughout the year to provide more career assistance for those with busy calendars
